New Product Notification 28/06/2023

Yale Unity Entrance Lock: **YALE ES**

Yale Unity Entrance Lock Fire Rated with accessible compliant Lever has been designed with all necessary hardware to achieve AS1905.1-2015 fire certification integrated into the escutcheons. There's no additional hardware to install or modifications required. This model has achieved two-hour certification on the most popular fire door models in accordance with AS1905.1-2015, making it suitable for both multi-residential and stand-alone residential applications.

To comply with fire door requirements in common multi-residential applications, the Yale Unity Entrance Lock Fire Rated with Accessible compliant Lever has removed the Digital Deadlocking (Secure Mode) feature.

The Yale Unity Entrance Lock Fire Rated version is compatible with popular accessories, including the Yale Smart Keypad and Connect Plus Wi-Fi Bridge*.

works with
Google Home

Owners and family members can share, manage, and monitor access to the home with caregivers, support services as well as other family members, taking the stress away from having to coordinate access and prepare spare keys for others.
