EVOLUTION

SLIDING DOOR MORTICE LOCK

The Evolution range features an aluminium bodied mortice lock, D pull handle and flush pull set. The range is designed for easy use and simple installation. The twin counteracting beaks engage an all metal catch plate, providing resistance to jemmying and restrains the door against being lifted externally from it's rails. The components can be powder coated, allowing the entire door to have a uniform colour finish.

Features:

- No machining at jamb required
- Suitable for 2,3 and 4 panel sliding, stacking and corner configurations
- Twin counteracting latches for added security
- Powder coating available to match all hardware
- 30mm set back for jamb clearance

Compatible systems:

- Titan Sliding Door
- Ultramax Sliding Door
- Preferred style CAD157

TWIN BOLT LOCKS

The Edge Twin-Bolt Lock is a stylish handle driven twin-bolt locking system which is quickly and easily fitted to the Bi-Fold stiles and allows the top and bottom locking rods to be engaged/disengaged with a single action rather than having to manually operate the top and bottom flush bolts individually.

The Twin-Bolt is an efficient solution for taller doors where flush bolts are not viable.

The Edge Twin bolt locks are available in locking and non locking styles. The Twin Bolt Locks are sold in kits which come equipped with the lock (in either black or satin chrome) and rod-kit.

LOCKING

Ordering Information:

Black twin-bolt kit

Part number: **EDGE-KIT1**

Right: **EDGE3110B**

Compatible systems:

- Titan Vista
- All Commercial Flat Sash
- CA470

HINGE DOOR LOCK

The Edge suite is headlined by the Induro lock, paired with the exclusive Edge style handles.

The Edge Handle is a door handle exclusively sold by Concept Architectural Systems that comes standard with 4-point locking. It is sold in a kit with 6 components that can be interchanged with accompanying products in the Edge range. A key feature is the locks turn snib cylinder which allows the door to be locked and unlocked from inside without a key. Is available in matt black, pearl white, and satin chrome.

The Induro lock can be paired with all Concept hinge doors as well as the Bi-Fold door, this includes French/double doors.

Ordering Information:

WHITCO CHAIN WINDER

Suits all of the Alures awning windows range including Alucom range of commercial awnings window.

Features:

- Push button to lock, key to unlock
- Maximum opening 300mm, 19 handle turns to fully open
- Foldable knob in handle reduces width preventing damage and interference with blinds
- Zinc die cast body and mechanism, Passivated Zinc steel base plate and Passivated Zinc steel chain
- Exceeds the requirements of Australian window lock standard AS4145.3-2001 level DW2S-W2k1
- The chain can be restricted to either 100mm or 150mm opening length via fitment of a restrictor clip to the chain. The fitment of the restrictor clip assists the window to comply with Building Code Australia requirements D2.24 Protection of Operable Windows

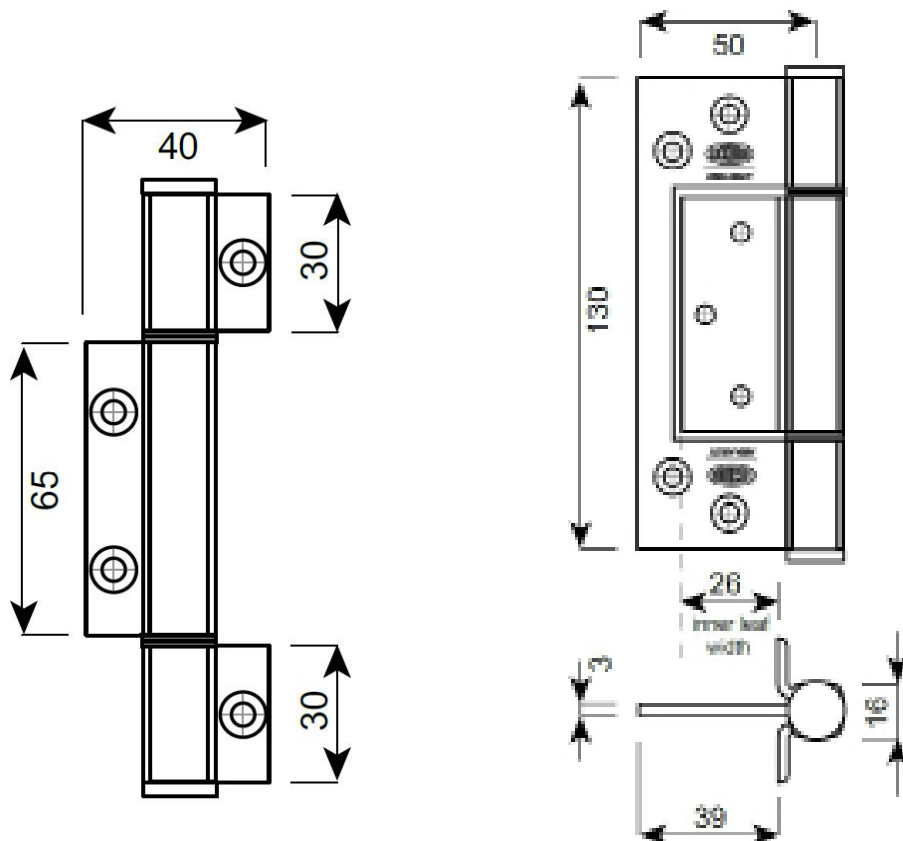

FAST FIX DOOR HINGE

The **AH130** is a heavy duty fast fix hinge with bi-directional face fix locator flanges allowing for fast and easy installation. They are the **recommended solution for both the Apollo domestic entry door and our full suite of commercial hinge doors**. They are available in three finishes: clear anodised and black and white. Not recommended for panels over 100kg.

Specifications:

- Hinge: 6063- T6 alloy
- Hinge Pin: 6mm 304 grade stainless steel
- Nylon bushes
- Square line heavy duty knuckles
- Interference pressed fit aluminium end caps

Overall Dimension:

Clear Anodised
Code: **AH130CAN**

Black
Code: **AH130BLK**

White
Code: **AH130WH**

YARRA VIEW EDGE

The Yarra View Edge is an all-metal lock for aluminium sliding glass doors featuring a contemporary design. Stocked in black satin powder coated finish with other colours available on request.

Features:

- Twin counteracting beaks engage an all-metal catch plate
- Self-adjusting catch plate automatically compensates for building movements and door carriage wear
- Anti-slam plunger prevents the door being shut with beaks extended, avoiding damage to beaks and catch plate
- Fits industry-standard three-hole door cutouts (three 9mm diameter holes)
- Suits left-closing and right closing (lock is not handed)
- Australian designed and manufactured
- Choice of wafer and 5-pin type lock cylinders
