

CA490 REVEAL ADAPTER

Concept Architectural Systems is proud to announce the new 100mm Reveal Adapter.

The CA490 suits all 100mm commercial systems and features a 19mm reveal leg.

Previously, the **CA430** was used when adapting commercial systems to utilize standard 19mm timber reveals. However, this required the 30mm leg to be snapped down to 19mm. The new **CA490** eliminates the need for snapping legs, reducing fabrication time.

The CA490 is now in stock and immediately available. It is available in Logikal - it can be found under the **wall connections** feature.
