Heavy Duty Screen Door Closer

The 404 is the first Hydraulic Screen Door Closer specifically designed for the Australian market, suitable for screen doors weighing up to 29kg. The 404 is a heavy duty screen door closer that is better suited for stainless steel mesh doors which are heavier than the traditional Diamond Grille security screen doors.

The screen door closer offers smoother operation and a quality feel. Highly adjustable, it can still be used on traditional screen doors, and offer all the same advantages. Whilst improving the closer module itself, all the familiar design features, including the Rod Retaining Clip preventing the closer from dislodging have remained the same

Features

- Spring loaded piston in hydraulic unit for smooth closing
- Heavy duty, suits heavier screen doors, without being too strong for lighter doors
- Very high level of adjustability
- Closing speed easily hand adjustable,
- spinning entire cylinder
- Door hold-open feature
- Surface mounting
- Automatic latch operation
- Easy installation
