

150mm Cladding Inspired Wall Battens.

For Internal and External Use

Screw and Clip On Design for Easy Assembly.

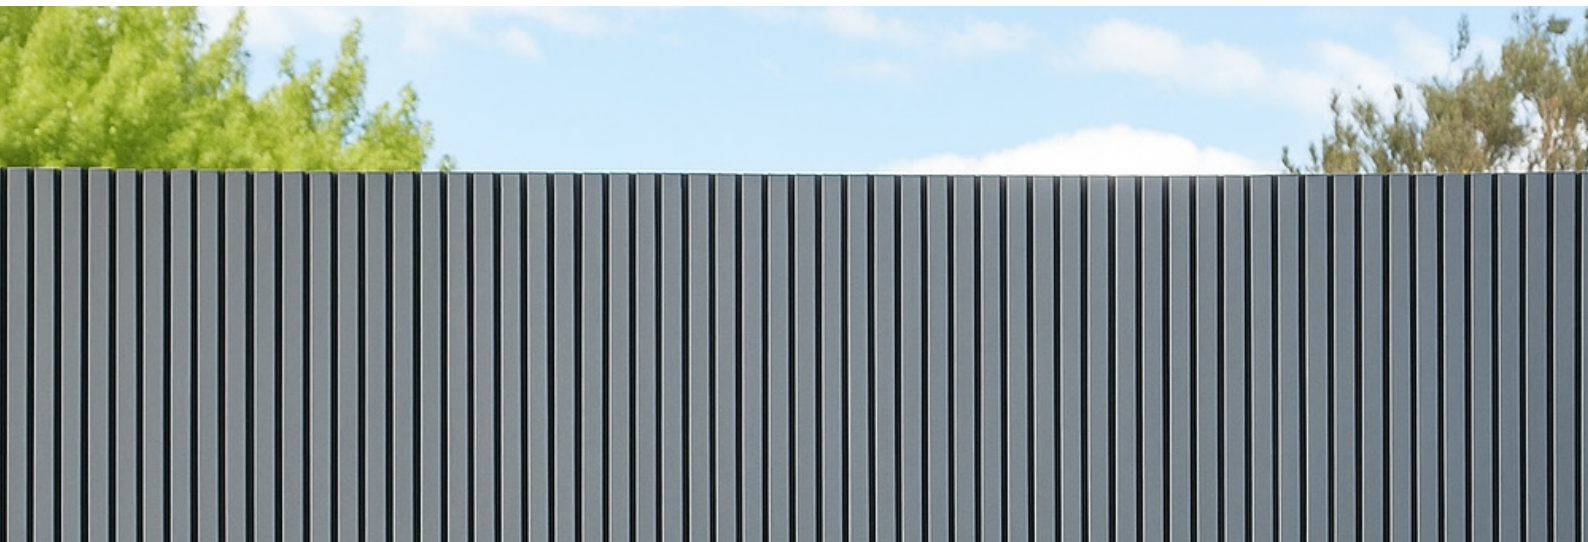

Our new 150mm wall battens imitate the installation of cladding, where the base plate is screwed onto the wall, and the battens are clipped on. This makes for an efficient installation process that will save you time during assembly and allow you to run battens across an entire wall with ease. Example applications for this system include feature walls or facades, partial wainscoting, and panel doors.

This system is extremely flexible and can be used on internal and external walls, or any flat surface. We offer rounded or square shapes that can run both vertically and horizontally, providing you with the flexibility to achieve your desired aesthetic.

With its balance of efficiency, durability, and design flexibility, the 150mm batten system provides a refined solution for enhancing walls and flat surfaces in residential or commercial projects.

Features and Benefits

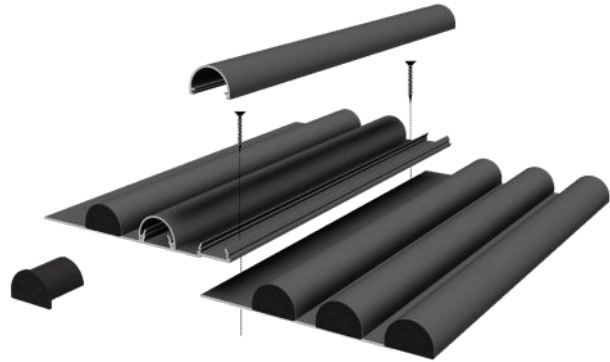

- ✓ Suitable for inwards and outwards facing corners.
- ✓ Base plate and clip on battens allow for easy and fast installation.
- ✓ Clean finish with hidden installation details including end caps.
- ✓ Battens can be powder coated in our full colour range, or wood grain finishes.
- ✓ Versatile systems that can be used for various spaces and design applications.

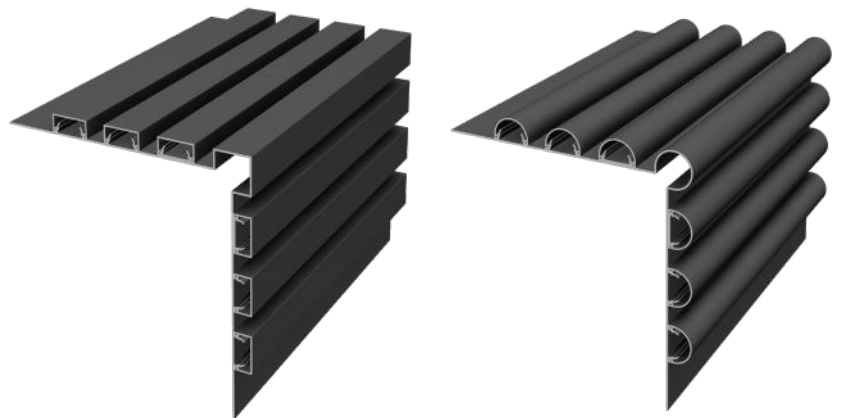

Versatile Design Applications for Interior and External Spaces.

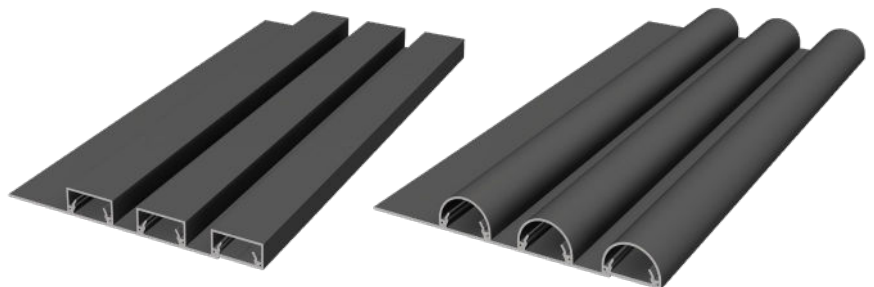

Assembly process demonstrating how the battens clip onto the base, and end caps are clipped in.

Round and Square end caps battens when wrapped around a wall corner.

Round vs Square batten options to suit your preference.

Engineered to Seamlessly Wrap Around Walls.
