

Commercial Zero Threshold Gutter Sill.

Allows for Recessed Apartment Doors

Fulfilling increasing demand for seamless entries.

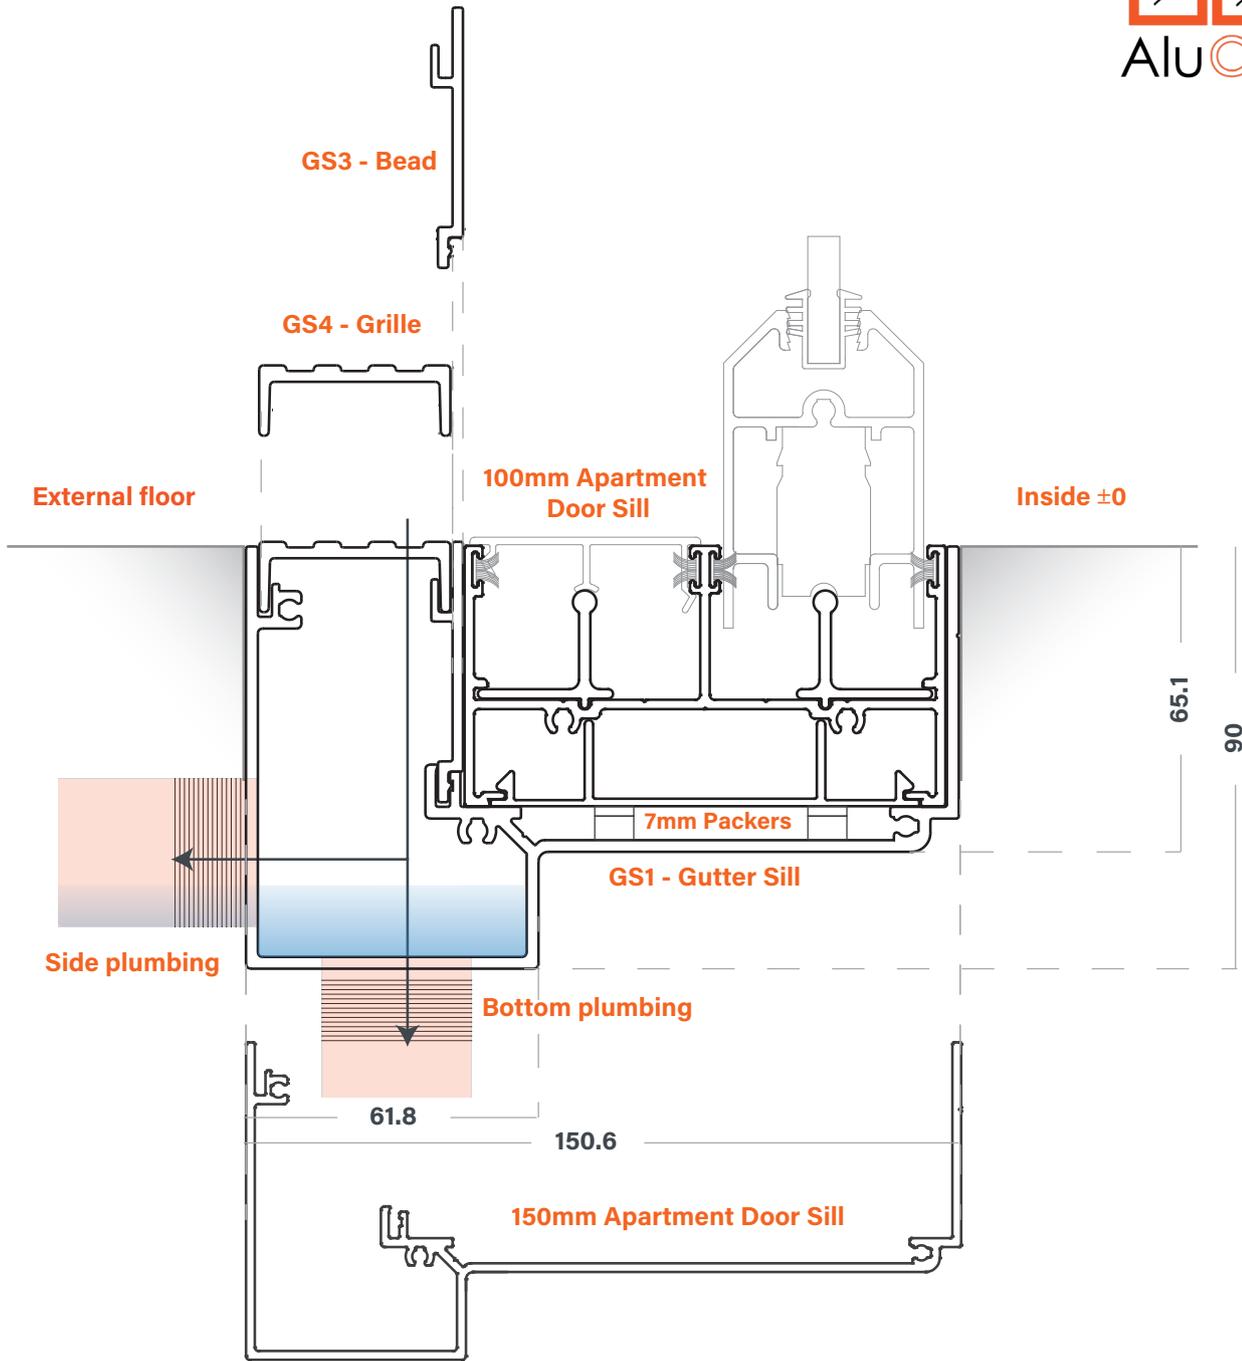

The CAS Commercial Gutter Sill allows a recessed apartment door sill to be installed perfectly flush with the floor, delivering a smooth, seamless transition with no step. A 40mm drainage grille is positioned directly outside the sill to efficiently capture and channel water runoff, maintaining a high level of drainage performance.

This system is ideal for projects requiring disability access compliance, creating a safe, step-free entry that allows seamless movement between spaces. It is equally suited to designs seeking a clean, minimalistic aesthetic which is increasingly growing in demand from designers and architects. This makes it the perfect choice for both functional performance, and design appeal.

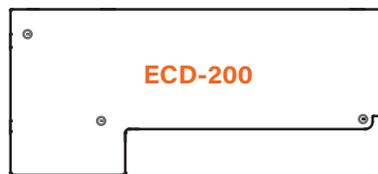

Compatible Systems:

- 2 Track Titan Apartment Door
- 3 Track Titan Apartment Door
- 2 Track Ultramax Apartment Door
- 3 Track Ultramax Apartment Door

***The CAS Commercial Gutter Sill is available in 100mm and 150mm configurations and is compatible with multiple door systems**
