

AluSPAN Srata Battens System

Versatile 6 Size Batten System

Bring Sophistication and Style to Any Space

The AluSPAN Strata Batten System delivers a refined, architectural solution for a wide range of applications, from fencing and window privacy screening to full building facades, as well as commercial uses including external fins and internal partitions. Designed to create clean, consistent lines, the system enhances depth, texture, and rhythm across both residential and commercial environments.

When used for sun shading or privacy screening, Strata Battens can also contribute to improved energy efficiency by reducing direct solar heat gain, helping to achieve more stable internal temperatures. The Strata Battens System consists of a base, batten, and end cap, working together to conceal fixings and achieve a clean, seamless finish.

Lightweight and engineered for efficiency, Strata Battens utilise a simple two-step assembly process, ensuring convenient and reliable installation. Manufactured from aluminium, the system offers long-term durability with minimal maintenance required. To suit any project, Strata Battens are available in a full range of powder coat finishes, natural anodising, or 39 Atwood Wood Finishes for a realistic timber appearance with the performance.

The Strata Battens System is available in 5 standard sizes which all share a common base and countersunk screw for streamlined specification and consistent structural performance. A Slim Line Batten is also available and features its own dedicated base and counter sunk fixings for a refined, high-performance finish.

External facade 50mm Batten (BT50)

Fast Assembly Lightweight Design

Decorative feature
50mm Batten
(BT50)

External fins
200mm Batten
(BT200)

Features and Benefits

- ✓ Suitable for residential and commercial applications, both internal and external.
- ✓ Features an efficient two-step assembly process for quick, reliable installation.
- ✓ Six batten sizes are available, including a 50mm x 25mm slimline option.
- ✓ Supplied with add-on aluminium end caps with counter sunk screws to deliver a clean, refined finish with concealed installation detailing.
- ✓ Fully customisable with our complete range of powder coat finishes, natural anodising, or 39 premium Atwood Wood Finishes for a realistic timber finish.

Strata Battens System Profiles and Hardware

*Please note that all aluminium end caps can be powder coated to match the battens and base, and each are sold separately.
